Kansas City 10, Missouri

Following the originators name you will find two numbers, thus: 6-12, which means that for the past two years this variety bloomed approximately on June 12th. You can now make up a complete 2 month spread of bloom by selecting your plants according to this system. Below are blocks of dates to pick from for a two month spread. Pick one or more from each block and you will have blooms for two full months. This is the first time that anyone has ever taken the trouble to note month and day of bloom for each variety. Of course in the north the blooms will start later and the farther south you go the blooms will start sooner.

May	May	May	June	June	June	June	July
5-7	5-15	5-23	6-1	6-9	6-17	6-25	7-3
5-14	5-22	5-30	6-8	6-16	6-24	7-2	7-13

Remember, the size of a plant does not indicate better plants, as some plants make small divisions and some plants are as large as cornstalks. Some nurseries also feed their plants heavily with nitrogen fertilizer thus swelling up the plant to large juicy sizes, but beware of these plants because while they look beautiful upon arrival you will find that they have a habit of setting back and sulking from a year, sometimes until the second year. We have purchased such plants and know what we are talking about, you can be sure we do not reorder from these sources again. Normally a plant should bloom the following season if grown in a normal manner. The fertilizing should be done after you plant the plant so that it can more easily become accustomed to your soil. Also our plants are shipped by a special process so that they arrive green and crisp right out of the garden. No dried up small roots from us, ever.

This list has been compiled very carefully, not only to weed out those similar, but also the inferior ones. Also these varieties while in the main not high priced, are every bit as good as most higher priced ones, and in some cases even superior to some of the newer ones. We have hundreds of varieties and like most growers, we are forced to limit our selections, having to leave out many choice ones due to limited space, but if you wish you may order any not listed by us at a competitors price and take our bonus discount, the same as if we have listed it. In the event we might not have it we will immediately refund your purchase price so that you may buy it elsewhere. Thank you for your interest in our catalog and we know if you purchase plants from us you will continue doing so, as so many of our customers of the past continue doing.

Happy Gardening,

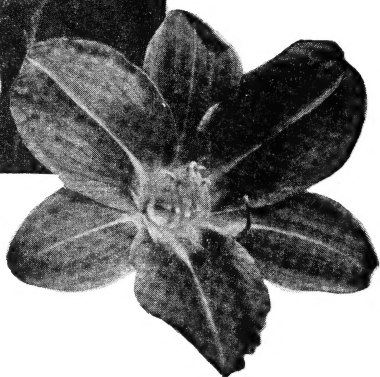

E. C. Machowski

Could any grower ask for finer compliments?
LETTERS FROM OUR VALUED CUSTOMERS.

I want to thank you for a very pleasant surprise. When I saw the prices in your catalog this spring, I said to myself, "They must send out very small plants." There were a number of varieties I have been wanting, however, and at such low prices, I just couldn't resist. I thought I would get them started and enjoy the blooms a few years from now. When the package arrived yesterday, I could hardly believe it. The plants you sent me were just as large if not larger, than the ones I've been getting from other growers. And they were beautifully packed. I was really amazed. I thought the least I could do was to tell you how grateful I am.

NEW JERSEY

I should like to tell you how very pleased I was with the plants you sent me last week, the "Pastel Collection of Daylilies." Never have I seen plants more beautifully packed. They arrived in perfect condition, and plants of such sturdy quality. The Daylilies bought from you last year are all up, a good foot high and more, some already increasing and spreading. It is a joy to put such stock in the garden and to look forward to years of pleasure in flowers.

MINNESOTA

The Daylily order which I sent you a few days ago was filled with such lovely plants that I'm sending another order at once.

LOUISIANA

Received my Daylilies and I was amazed when they came (with buds on yet) how wonderful. I can't thank you enough, that surely means you will be highly recommended to my friends and also for future orders for myself. I am still amazed. Thank you also for the wonderful extra, was very happy.

WISCONSIN

The Daylilies arrived in fine shape, have bought quite a few Daylilies but none nicer than these.

KANSAS

Received the replacement on the Daylily order yesterday, they came through in fine shape. Order so fresh and big. I planted as soon as I got them and shaded with bushel baskets, and sure look for some husky plants by freezeup. Many thanks and a pleasure to find a garden as honest as Kansas City Daylily Garden.

WISCONSIN

The plants I received not long ago were just wonderful and are growing like mad, and thanks a million for the Bicolor. I'm sure it will be as wonderful as the rest.

Thank you so much for the large hardy looking plants you sent me they were nice large clumps, also for the free one.

UTAH

Gentlemen: Just a note to say that my order of Daylilies arrived today, and the plants looked wonderful. I am thoroughly pleased with them in every way.

FLORIDA

We always endeavor to send you the largest plants possible, but in some cases, where the variety is new or when a variety does not naturally make large plants, we will send the best we have which in the majority of cases will be plants that will please you—We do not like to send small plants to our customers.
